

P L C 1 2 S E R I E S

Specifications

Pressure:

Vacuum to 120 psi, 8.3 bar

Temperature:

32°F to 160°F (0°C to 71°C)

Materials:

Main components and valves:

Polypropylene

Thumb latch: Stainless steel

Valve spring: 316 stainless steel

External springs and pin: Stainless steel

O-rings: EPDM

Sterilization:

Gamma: Up to 50 kGy irradiation

Color:

Almond

Tube Sizes:

1/4" to 3/8" ID, 6.4mm to 9.5mm ID

WARNING: Pressure, temperature, chemicals, and operating environment can affect the performance of couplings. It is the customer's responsibility to test the suitability of Colder's products in their own application conditions. Use the graph at the right as a guide.

The 1/4" flow polypropylene PLC12

offers many of the same configuration options as the PLC. The polypropylene material adds greater chemical resistance for more demanding applications. PLC12 couplings are also gamma sterilizable.

The PLC12 Series is also available with optional RFID (Radio Frequency Identification) capability.

Features

- Polypropylene material
- EPDM o-rings
- Colder thumb latch
- Integral terminations

Benefits

- Chemically resistant and gamma sterilizable
- Greater chemical resistance
- One-hand connection and disconnection
- Fewer leak points, shorter assemblies, faster installations

Liquid Flow Rates

Liquid Flow Rate Information for Couplings

The chart below shows the flow rate for Colder couplings. Each coupling was tested with water at 70°F (21°C). To determine flow rates for specific coupling configurations use the formula to the right.

$$Q = C_v \sqrt{\frac{\Delta P}{S}}$$

Q=Flow rate in gallons per minute
 C_v=Average coefficient across various flow rates (see chart)
 ΔP=Pressure drop across coupling (psi)
 S=Specific gravity of liquid

C_v Values for 1/4" Flow PLC12 Couplings

PLC12 Air Flow, 100 psig Inlet Pressure

PLC12 Water Flow

PLC12 Pressure Range

These graphs are intended to give you a general idea of the performance capabilities of each product line. The shaded area of each graph represents the operating range of the product family, i.e., upper and lower values are shown. Therefore, depending on the exact coupling configurations selected, you can reasonably expect values to fall within the shaded area.

SMART COUPLINGS WITH REID

The IdentiQuik® Series of smart couplings are RFID enabled couplings used on equipment and in processes. RFID is an automatic identification method that relies on remotely writing and reading data. Smart coupling applications include: inventory level meters, medical equipment calibration, product protection, and many more.

IdentiQuik PLC Series

- (((**Identify misconnections:** eliminate out-of-sequence connections or misconnections due to operator error
- (((**Protect your brand:** prevent out-of-date, incorrect or misapplied products from being used
- (((**Prolong equipment life:** prevent the accidental or unintentional use of harmful media
- (((**Save time:** automatic documentation of package and media lot numbers, date codes and more

RFID Specifications

RF Communication Range:

Approximately 1"

Operating Voltage:

8-25V standard, 5V only available

Power Consumption:

350mW maximum

Communication:

ASCII RS-232 (DB-9)

I-Code RFID Tags:

13.56 MHz
ISO-15693 - 112 bytes programmable

NOTE: RFID tags not approved for e-beam or gamma sterilization.

Operating Temperature:

32°F to 150°F (0°C to 65°C)

Materials are listed on page 34. Customized parts (materials, voltage, termination, cable length, etc.) available. Call for more information.

PLC12 couplings are gamma sterilizable; see page 110 for more information on sterilization and disinfection.

All measurements are in inches (millimeters) unless otherwise noted. Tubing must meet stated inside and outside diameters. †NOTE: Colder's Ferruleless Polytube Fitting terminations do not require ferrules to achieve a secure connection, which makes them easier to use and reuse. PTF fittings are designed for semi-rigid tubing, i.e., polyethylene, nylon, polyurethane, etc.

DID YOU KNOW ...

Many of Colder's general purpose couplings and fittings can be used across a wide variety of markets and applications?

Quick tip: use the Chemical Compatibility Table at www.colder.com to help determine which product is best for your fluid handling application.

All measurements are in inches (millimeters) unless otherwise noted. Tubing must meet stated inside and outside diameters. Couplings are pictured with valves unless otherwise noted. †NOTE: Colder's Ferruleless Polytube Fitting terminations do not require ferrules to achieve a secure connection, which makes them easier to use and reuse. PTF fittings are designed for semi-rigid tubing, i.e., polyethylene, nylon, polyurethane, etc.
